

CEMETERY/BELL HOLE BUCKET

RECOMMENDED APPLICATIONS:

Werk-Brau's Bellhole bucket is specifically designed for digging straight vertical walls needed for graves. The Bellhole Bucket has rotation incorporated to enable the operator to dig the straight vertical walls as well as a flat bottom. The flat bottom of this bucket will not drag when curled. This bucket is not designed for normal trenching or use in tough digging conditions. This bucket may not work with all quick disconnect attachments.

QUALITY CONSTRUCTION:

Each Bellhole Bucket is made from high strength, wear resistant steel in all critical components. A rigid top section combined with a durable cutting edge ensure long life. This heavy duty grave bucket utilizes gussets and wear straps for extra strength.

CUTTING EDGE OPTIONS

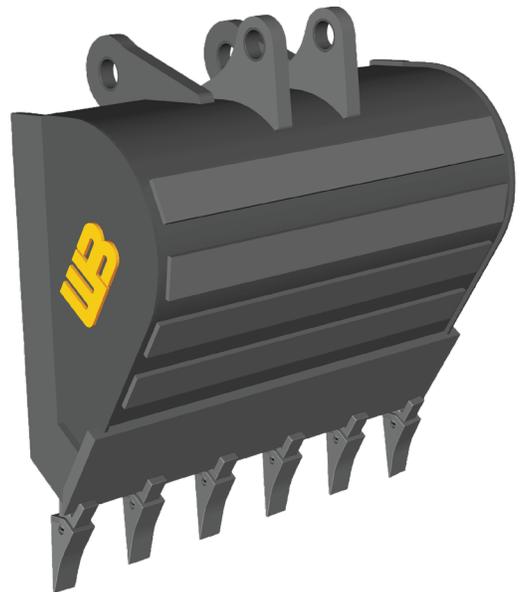

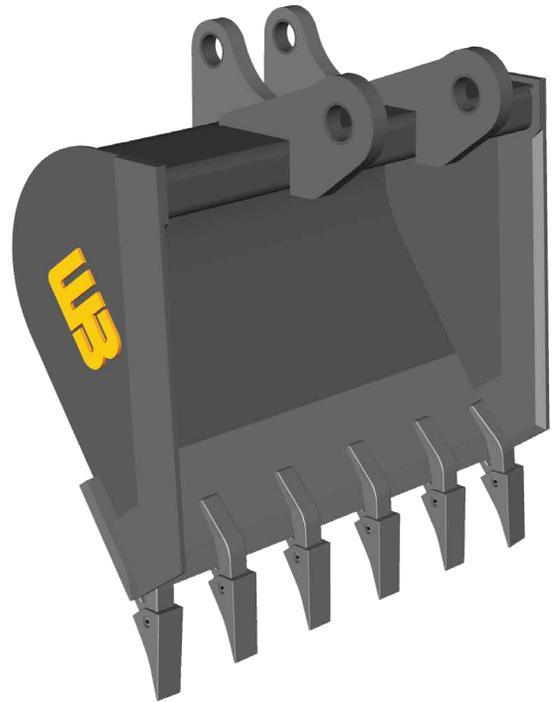

OEM approved pin-on teeth are utilized on the standard model and cast teeth in the heavy duty.

STANDARD SIZES AVAILABLE:

24", 36" and 42" models are available depending on machine model.

ADDITIONAL FEATURES::

Side Cutters are available upon request. Special designs and capacities are available, please request a quote from a Dealer or contact Werk-Brau directly.
