

DROP CENTER BUCKET

RECOMMENDED APPLICATIONS:

Specifically designed to meet customer specifications for laying up to three utilities in one trench. The bucket shape digs a lower center trench with an upper trench to both sides, which also works well for digging footers. Not designed for extreme digging conditions.

QUALITY CONSTRUCTION:

T-1 steel is utilized in all critical and high wear components. Each bucket is engineered with tapered side plates to reduce wear on the buckets sides, and to allow for easier dumping.

CUTTING EQUIPMENT OPTIONS:

Equipped with industry standard teeth for extra durability. A selection of quality brand teeth are available to choose from.
