

HYDRAGRIP BUCKET

RECOMMENDED APPLICATIONS:

Confidently handle heavy, awkward loads, grab buckets of debris and clear away brush with the Hydra-Grip Bucket. The built-on thumb provides improved flexibility and precision by maintaining consistent clamping force on the load throughout the entire bucket rotation. The heavy duty design makes it perfect for demolition, picking/sorting applications and land clearing.

QUALITY CONSTRUCTION:

Made of high quality T-1 and AR400 materials in all high stress & wear areas. Includes a plastic covering on thumb to protect the stick. Features cushioned cylinders to reduce impact load on cylinders and recessed boxes to protect cylinders and hoses. The cylinder design provides superior grip strength vs the actuator style and has a lower cost of maintenance in the event of a failure

STANDARD SIZES AVAILABLE:

1/8 cu. yd to 3 cu. yd. available. Other capacities available upon quotation.

ADDITIONAL FEATURES:

Easy, low cost installation. Nothing needs welded to the stick. Easily transferrable from machine to machine making it the perfect attachment for a rental fleet. Operator can use 100% of excavator reach making it easier than ever to load trucks. The attachment requires very little maintenance requiring just two auxiliary maintenance lines.
