

MANUAL ADJUSTABLE FORKS

RECOMMENDED APPLICATIONS:

Manual Adjustable Forks are for the removal or displacement of palletized material and/or pipe. They are offered in both a standard duty and heavy duty fork frame version (shown).

QUALITY CONSTRUCTION:

High strength steel construction with high tensile strength forged forks for long wear. Tines are tapered to prevent wedging. Heavy duty version includes a heavier carriage and a 6,500 lb clevis.

STANDARD SIZES:

45" Carriage
Tine Options: 42", 48", 60"

ADDITIONAL FEATURES:

Available with Werk-Brau front coupler or pin-up connection. Anti-swing is standard - special designs and capacities are available, please request a quote from your local dealer.
