

HIGH PERFORMANCE LIGHT MATERIAL LOADER BUCKET

RECOMMENDED APPLICATIONS:

The Werk-Brau High Performance Light Material bucket has a Light material design with enhanced high-performance profile ideal for material up to 2,000 lb/cy. Ideal for fertilizer & feed applications to prevent spillage. Designed for handling materials such as corn, silage, hay, cottonseed, and other lightweight materials.

QUALITY CONSTRUCTION:

Curved side plates & increased roll back angle allow for greater material retention. 5%+ greater material retention. Inclined bottom to reduce loading force

STANDARD SIZES

2.00 cu. yd. to 15.00 cu. yds. of various widths are available. Special designs and capacities are available upon request.

ADDITIONAL FEATURES

All bucket attaching ears meet OEM specifications including proper "dump" and "roll" stops. Special designs and capacities are available, please request a quote from a dealer.
