

# LOADER COUPLER

## RECOMMENDED APPLICATIONS:

Designed to quickly and easily change from one attachment to another without the operator leaving the cab. Coupler enables the operator to utilize various attachments on a single job. Recommended applications include rental fleets, municipal operations, general construction, material handling, and farming and agriculture.

## QUALITY CONSTRUCTION:

High strength steel is used throughout the unit. Locking pins designed with hard chrome for wear and corrosion resistance. Dual-acting hydraulic cylinder and fittings with open design provides maximum visibility while mounting to various attachments.

## ADDITIONAL FEATURES:

Proudly built in Findlay, OH. Werk-Brau offers four different styles of couplers to meet any preference or need: ACS, ISO, IT & JRB. Exact style must be specified when quoting/ordering.
