

Ripper

Recommended Applications:

Werk-Brau's Ripper is specifically engineered to pre-rip frozen ground, pavement, or other tough soil that exceeds a bucket's recommended duty. This highly versatile attachment can also be used to remove stumps, roots, or re-bar. The Ripper's single point tooth style is ideal for penetration of various tough environments.

Quality Construction:

Werk-Brau uses T-1 steel in all critical or high wear components to ensure that the ripper has a long operation life. The ripper body is supported by rigid gussets for extra rugged applications. The upper gussets, and shank are designed for heavy duty applications in tough working conditions.

Cutting Equipment Options:

A single point tooth is used to maximize the machine's penetrating power. A selection of high quality brands are available to choose from.

Standard Sizes Available:

A selection of sizes are available to match each machine.

Additional Features:

Dual ripper styles available. Different teeth available. Special designs are available, please request a quote from a Dealer or contact Werk-Brau directly.
