

Pavement Removal Buckets

Werk-Brau's Pavement Removal Bucket turns the process of removing pavement and cement into a quick and easy one-man job. Designed to easily wedge under pavement, the Pavement Removal Bucket maximizes the hydraulic forces of today's excavators. The unique, C-type profile of this bucket expedites the removal of broken concrete and pavement slabs.

- Bottom wear straps provide extra protection and contribute to long operation life
- Different teeth styles available upon request
- Various sizes available to fit compact utility models as well as full-size excavators
- Special designs and capacities available upon quotation
- Additional options available upon quotation
