

V-Line Strata Rock Bucket

Recommended Applications:

This bucket is specifically designed for excavating frozen ground and layered rock. The V-Line design enables the machine to exert all of its force at a single point. A extra-severe duty model is available for heavier applications, involving tougher and more abrasive rock. These kinds of buckets can also be used for moderate prying.

Quality Construction:

T-1 steel is utilized in all critical or high wear components. This bucket features steel walls thicker than other buckets, with heavily reinforced wear areas. Each bucket is engineered with tapered side plates to reduce wear on the buckets sides, and to allow for easier dumping.

Cutting Equipment Options:

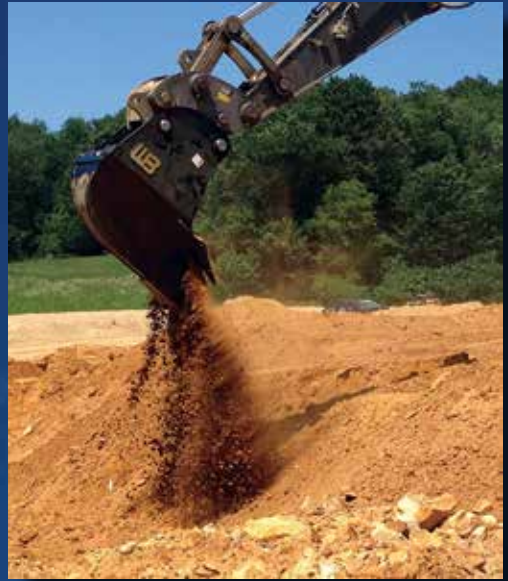

Twin pointed teeth are set in a manner to provide maximum penetration. A variety of teeth are optional for this bucket.

Standard Sizes Available:

1/4 cubic yd. to 3 cubic yds. of various

Additional Options:

Anti-clatter available for certain models. Special designs and capacities are available, please request a quote from a Dealer or contact Werk-Brau directly.
