5 Attachment Versatility

General excavating

Trenching

Grading

Clamshell

Grapple /
hydraulic thumb

PowerGrip[®]
Bucket

The PowerGrip is a multi-purpose bucket that eliminates the need for additional attachments. Specifically designed to enhance a machine's grading, trenching, or clamshell capabilities with precise control and can be utilized with a mechanical or hydraulic coupler.

Features

Enclosed rotary actuator hinge in cross-tube

No obstruction in jaw or bucket shell

No exposed cylinders or other external moving parts

120° of jaw movement

Consistent clamping force through jaw's full range of motion

Equal force exerted at both sides prevents jaw twisting

Standard OEM lugging

Quick-coupler compatible

Uses existing auxiliary hydraulic circuit

Clamping force approximately 3x of standard thumb

QUALITY CONSTRUCTION:

High strength steel is used throughout the weldment. Hardened, greasable bushings are utilized at all pivot points. Tapered side plates reduces wear on the bucket sides and allows easier dumping.

STANDARD SIZES AVAILABLE:

Widths range from 24" through 60" pending machine class. Capacities range from 0.46 cu yd up to 1.50 cu yd.

CUSTOM OPTIONS:

Variety of tooth options or bolt-on cutting edge readily available for unique customization. Please request a quote from a dealer or contact Werk-Brau directly.
