

BOX STYLE GRAPPLE

RECOMMENDED APPLICATIONS:

Werk-Brau's wide mouth box style grapple is specifically designed to handle various objects of different sizes such as brush, rocks, and demolition debris. Single grapples may be used with a bucket. Dual grapple styles are also available. Not designed for digging or prying.

QUALITY CONSTRUCTION:

T-1 steel is utilized in all critical or high wear components to ensure that this grapple has a long operating life. High strength steel is used throughout the weldment. Pivot points are made from hardened greasable bushings, and are easy to access for regular greasing. The style of this grapple allows for additional reinforcement. At the end of each tine are edge pads.

CUTTING EDGE OPTIONS

Not applicable.

STANDARD SIZES AVAILABLE:

Various widths and models are available to choose from.

ADDITIONAL FEATURES::

Additional tines and width designs are available, please request a quote from a dealer or contact Werk-Brau directly.
