

GRUBBER

RECOMMENDED APPLICATIONS:

Specifically designed for tree and root removal below the ground. Easily extract root balls, mesquite root balls, and Cedar tree root balls.

QUALITY CONSTRUCTION:

Werk-Brau manufactures this grubber with triple pass welds in all high stress areas to ensure a long operating life. AR400 steel is used for the edge and sidecutters.

ADDITIONAL FEATURES:

Can be used with a thumb or clamp attachment allowing the operator to completely remove the root system.
