

WHEEL COMPACTOR

RECOMMENDED APPLICATIONS:

Werk-Brau's Wheel Compactor for Excavators is specifically designed to compact fill material in a trench as it is being back-filled. Each wheel compactor is designed with staggered pads for even compacting. Werk-Brau's Wheel Compactor also eliminates unsafe compacting in trenches.

QUALITY CONSTRUCTION:

High strength steel is used throughout the assembly. Replaceable heavy duty, durable sealed bearings ensure a long operating life in tough conditions. Each wheel is replaceable.

STANDARD SIZES AVAILABLE:

Various models are available, each having numerous widths for most excavators.

ADDITIONAL FEATURES::

Hardened bushings are standard in the pivots. Cleaner bars are incorporated into the design to prevent buildup between the wheels. Easily adaptable to quick-coupling attachments.

ADDITIONAL OPTIONS:

Different widths are optional. Additional wheels can be added. Special designs and options are available, please request a quote from a Dealer or contact Werk-Brau directly.
