

SPRING LOADED MANUAL COUPLER

RECOMMENDED APPLICATIONS:

Werk-Brau offers a complete range of manual couplers for all major brands and most machines. Werk-Brau's couplers are known for their tough build, versatility for pairing with any brand of attachments, safety features, tight lock, and ease of operator use. The Werk-Brau spring loaded manual coupler will work with any attachment from any manufacturer meeting OEM fit-up specifications. Each coupler features a heavy duty lift loop on the top hangers.

QUALITY CONSTRUCTION:

Werk-Brau manufactures the coupler using the highest quality T-1 steel in all critical or high wear components to ensure that this coupler has a long operating life. Werk-Brau's couplers are constructed using a solid one piece, front cross member which provides more wear service than most other competitive couplers available. A heavy duty lift loop is featured on the top hangers. Spring loaded manual couplers feature adjustable springs.

SAFETY PIN NOTICE:

Never operate a Werk-Brau coupler without it's approved safety pin in place. For additional information, please review the owners installation manual for this coupler. Additional, or replacement safety pins maybe ordered through a Werk-Brau Dealer.
